

New 1000V Insulated Hand Tools

nVent GARDNER BENDER continues to innovate and provide high-quality tools for professionals and DIY enthusiasts alike. The latest additions to our product lineup include 1000V tools, such as combination pliers, wire strippers, long nose pliers, and cutting pliers.

These tools are designed to meet the rigorous demands of electrical work, and with their 1000V insulation rating, they provide an added layer of safety. Designed to meet or exceed the IEC 60900 and ASTM F1505 standard for insulated tools, these tools help reduce the risk of injury if they make contact with an energized source. All mentioned tools are backed by a lifetime warranty for guaranteed performance and durability.

Features:

- Ergonomic, cushioned handle design - 1000V insulated for added safety
- A tool for every application – from wire strippers to pliers
- Rated for low-temperature use as low as -40°F

NVENT GARDNER BENDER 1000V INSULATED HAND TOOLS

GPS-3228INS

These 1000V insulated pliers feature an induction hardened cutting blade that is ideal for cutting mild steel, brass, copper, and aluminum wires, screws, and bolts; even in tight locations.

- Cut: Mild steel, brass, copper, and aluminum wire
- Ergonomic, cushioned handle design - 1000V insulated
- Forged steel construction, induction hardened cutting blade
- Tapered nose allows for cutting in tight locations
- Diagonal cutting surface for flush cuts, reducing exposure of sharp tips

GS-387INS

These 1000V insulated side-cutting pliers cut solid or stranded mild steel, brass, copper and aluminum wire.

- Cut: Mild steel, brass, copper, and aluminum wire
- Grip: Straight and curved serrated jaws, nail gripping hole
- Form/loop: Plier nose, wire looping station
- Ergonomic, cushioned handle design - 1000V insulated
- Forged steel construction, induction hardened cutting blade

GS-385INS

These 1000V insulated pliers have a long nose, multi-purpose design to perform three functions: Grip, Cut, and Form/Loop.

- Cut: Mild steel, brass, copper, and aluminum wire
- Grip: Straight and curved serrated jaws, nail gripping hole
- Form/loop: Long nose, wire looping station
- Ergonomic, cushioned handle design - 1000V insulated
- Forged steel construction, induction hardened cutting blade

GS-360INS

These 1000V insulated wire strippers can be used to strip solid or stranded wire, feature a locking mechanism and spring return.

- Cut: Solid and stranded copper and aluminum wire
- Strip: 10-20 AWG solid / 12-22 AWG stranded wire
- Grip: Serrated plier nose
- Form/loop: Plier nose, wire looping station
- Ergonomic, cushioned handle design - 1000V insulated
- Built-in locking mechanism
- Spring return
